Water therapy is an ancient, simple, natural, painless and therapeutic form of healing. Mineral baths have been used for centuries to help restore energy, improve circulation and promote health and well-being.

**DETOX** is a unique and popular combination of mineral salts and herbs especially created to assist the skin in releasing impurities absorbed from our polluted environment (food, air and water). This rejuvenating, cleansing bath helps to release physical and emotional tension, balances the body's aura (electromagnetic field) and stimulates the natural healing process.
